JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 125, Numbers 1–2, 15 December 2000

Contents

Preface: Numerical Analysis 2000. Vol. VI: Ordinary Differential Equations and Integral Equations xi

J.C. Butcher
Numerical methods for ordinary differential equations in the 20th century 1

L.F. Shampine and R.M. Corless
Initial value problems for ODEs in problem solving environments 31

N. Borovykh and M.N. Spijker
Resolvent conditions and bounds on the powers of matrices, with relevance to numerical stability of initial value problems 41

W. Govaerts
Numerical bifurcation analysis for ODEs 57

A. Iserles and A. Zanna
Preserving algebraic invariants with Runge–Kutta methods 69

V. Antohe and I. Gladwell
Performance of two methods for solving separable Hamiltonian systems 83

E. Hairer and G. Wanner
Order stars and stiff integrators 93

G. Vanden Berghe, H. De Meyer, M. Van Daele and T. Van Hecke
Exponentially fitted Runge–Kutta methods 107

J.R. Cash
Modified extended backward differentiation formulae for the numerical solution of stiff initial value problems in ODEs and DAEs 117

S. Li and L. Petzold
Software and algorithms for sensitivity analysis of large-scale differential algebraic systems 131

J.T. Betts, N. Biehn, S.L. Campbell and W.P. Huffman
Compensating for order variation in mesh refinement for direct transcription methods 147

W.H. Enright
Continuous numerical methods for ODEs with defect control 159

K. Burrage, P. Burrage and T. Mitsui
Numerical solutions of stochastic differential equations – implementation and stability issues 171

G.A. Bocharov and F.A. Rihan
Numerical modelling in biosciences using delay differential equations 183

J. Norbury and R.E. Wilson
Dynamics of constrained differential delay equations 201

C.T.H. Baker
A perspective on the numerical treatment of Volterra equations 217

A. Bellen, N. Guglielmi and M. Zennaro
Numerical stability of nonlinear delay differential equations of neutral type 251

K. Engelborghs, T. Luzyanina and D. Roose
Numerical bifurcation analysis of delay differential equations 265

N.J. Ford and V. Wulf
How do numerical methods perform for delay differential equations undergoing a Hopf bifurcation? 277

C.A.H. Paul
Designing efficient software for solving delay differential equations 287

E. Buckwar
Introduction to the numerical analysis of stochastic delay differential equations 297

C.T.H. Baker
Retarded differential equations 309

S. Shaw and J.R. Whiteman
Adaptive space–time finite element solution for Volterra equations arising in viscoelasticity problems 337

L.Gr. Ixaru
CP methods for the Schrödinger equation 347

A.L. Andrew
Asymptotic correction of Numerov's eigenvalue estimates with natural boundary conditions 359

L. Greenberg and M. Marletta
Numerical methods for higher order Sturm–Liouville problems 367

B.M. Brown, D.K.R. McCormack and A. Zettl
On a computer assisted proof of the existence of eigenvalues below the essential spectrum of the Sturm–Liouville problem 385

P. Junghanns and B. Silbermann
Numerical analysis for one-dimensional Cauchy singular integral equations 395

J. Elschner and I.G. Graham
Numerical methods for integral equations of Mellin type 423

A. Rathsfeld
Quadrature methods for 2D and 3D problems 439

I.H. Sloan
Qualocation 461

W. Hackbusch and B.N. Khoromskij
A sparse $\mathscr{H}$-matrix arithmetic: general complexity estimates 479

E.P. Stephan
Multilevel methods for the *h*-, *p*-, and *hp*-versions of the boundary element method 503

G.C. Hsiao, O. Steinbach and W.L. Wendland
Domain decomposition methods via boundary integral equations 521
